SUMMARY

Full Stack Software Engineer experienced in designing and shipping scalable web applications and LLM-powered systems end-to-end. Skilled in distributed architecture, cloud infrastructure (AWS), REST/GraphQL APIs, and modern GenAI tooling. Passionate about customer-obsessed engineering, code quality, and delivering reliable software at scale.

TECHNICAL SKILLS

Languages: JavaScript (Expert), TypeScript, Python, C++, Java
Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Shadcn UI
Backend: Node.js, Express.js, FastAPI, GraphQL, tRPC, REST APIs
Databases: PostgreSQL, MongoDB, MySQL, Neo4j, Redis
Cloud & DevOps: AWS (S3, EC2), Docker, CI/CD, Digital Ocean, VPS Deployment
GenAI / ML: LangChain, RAG, Vector Databases, OpenAI API, Agentic AI, Guardrails, Groq LLMs
Tools: Git, GitHub, Prisma ORM, Kafka, Zod, Postman

EXPERIENCE

- Full Stack Engineer** November 2025 – Present
SN Verse *Bilaspur, Chhattisgarh, India*
- Designing and developing full-stack features end-to-end, contributing to scalable system architecture and reliable production deployments with high engineering standards.
- Content Creator – Coding Education** March 2022 – Present
YouTube (Self-employed) *Remote*
- Created and published a complete Python course in Hindi, reaching thousands of learners and simplifying complex programming concepts for beginners.
 - Produced ongoing educational content on JavaScript, React, Node.js, Docker, and DevOps, demonstrating deep technical breadth and communication skills.
- Networking Intern** September 2023 – October 2023
Mahamaya Internet Service Pvt. Ltd. *Bilaspur, India*
- Built and deployed a Car Number Plate Detector with a team of three, containerizing the solution using Docker for reproducible, scalable deployment.
 - Gained practical experience with computer networking—routers, CCTV systems, VPNs—and applied Linux/WSL for network troubleshooting and security hardening.

PROJECTS

- CHAT.CODEBHAIYA – AI Chat Platform** | *Next.js, TypeScript, Express, MongoDB, LangChain, OpenAI* Feb 2026
- Built a full-stack AI chat app with JWT auth, real-time messaging, and dark/light UI; engineered a modular TypeScript REST API with tool-calling, semantic search, and Docker Compose deployment.
- SPREAD – Twitter-like Social Media Platform** | *Next.js, GraphQL, PostgreSQL, AWS S3* Dec 2025 – Jan 2026
- Built a full-stack social platform with Google OAuth + JWT, posts, comments, and follows; scalable GraphQL backend with Prisma ORM and AWS S3 media storage.
- CRASTONE – AI Resume Generator** | *Python, FastAPI, OpenAI API, Redis, MongoDB, Docker* June 2025
- LLM-powered resume generation backend using FastAPI and OpenAI API with Redis caching, MongoDB persistence, and Docker deployment—built for high-throughput, low-latency production use.
- CODEBHAIYA – Full Stack Blogging Platform** | *Next.js, TypeScript, PostgreSQL, AWS* May 2024 – Jul 2024
- Shipped a production-grade blogging platform for 100+ users with OAuth auth, email notifications, Redux state management, and CI/CD deployment on Digital Ocean.

EDUCATION

- Chouksey Engineering College** Bilaspur, India
Bachelor of Technology in Computer Science Engineering – CGPA: 7.63/10 *June 2021 – July 2025*
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Distributed Systems, Networking, Object-Oriented Programming

ACHIEVEMENTS & CERTIFICATIONS

- Machine Learning with Python** – Certified (IBM / Coursera)
Python Course Creator – Published a beginner Python course in Hindi on YouTube with thousands of views, driving customer success through accessible tech education.
